

Pogo's Activity Arcade

Pogo's Activity Arcade is a handy dandy tool only available at Catalyst Ranch. It's chock full of self-guided activities to engage your attendees, promote collaboration, and boost creative problem solving. We've curated 3 binders full of materials to suit groups of all sizes and they can be used at your convenience throughout the day.

Pogo's Activity Arcade is complimentary

Arts & Crafts

Take a hands-on approach to team building with activities that encourage visual communication and expression. **Many of these creative challenges came from the world of art education, but have been reinvented with a unique Catalyst Ranch twist.**

In addition to making striking visuals that can be displayed throughout the day, participants will use basic art principles to articulate their ideas and unleash creativity. There's enough eclectic inspiration around the Ranch to bring out the artist in every attendee!

Brain Teasers

Riddles, puzzles, and trivia OH MY! What's more stimulating than a little competitive match of wits and brain power? Games and play are an essential part of the creative process at the Ranch and this collection is sure to enhance your meeting.

Facilitate as a whole or distribute individual puzzles to small groups to encourage collaboration and discover new approaches to problem solving.

Self-Guided Energizers

In this binder you'll find a myriad of ways to **spark unique conversation, build camaraderie, and add a flair of the unexpected to your day.**

Each one of these quick energizers has been custom-tailored to stir up the creative juices of your participants. Ponder impossible scenarios in "What If?", find new meaning in the abstract with "Repurposed Art", or use "11 Circles" to unlock your unconscious potential.

These fun, informal activities help create an environment that removes judgment and encourages risk taking. You'll be amazed at the ideas that your team generates together!
